Health AND Human  
SERVICES**

**2021 VITAL STATISTICS OF IOWA  
APRIL, 2023**

# Notice of Data Reporting Changes

## RACE REPORTING

For more than 10 years, the National Center for Health Statistics (NCHS) has provided Bridged Race codes on registered birth and death records. Race bridging is “a method used to make multiple-race and single-race data collection systems *sufficiently comparable* to permit estimation and analysis of race-specific statistics.” Race bridging was intended to be temporary until all 57 Vital Records jurisdictions fully implemented the latest Revised U.S. Standard Certificate of Live Birth and Death.

This race data is no longer being provided by NCHS or the Census, so the reported race categories have been modified. Below are the categories used in past years, and the new categories (along with shortened versions) being used in this report.

### PREVIOUS CATEGORIES

White  
African American  
Asian / Pacific Islander  
Other

### CURRENT CATEGORIES

White  
Black or African American (Black)  
American Indian / Alaska Native (AIAN)  
Asian  
Native Hawaiian / Other Pacific Islander (NHOPI)  
Two or More Races (ToM Races)  
Other / Unknown Race (Oth. / Unk.)

## MATERNAL DEATH REPORTING

Death coding by the National Center for Health Statistics changed in 2021. Beginning 2021, NCHS modified the manner of identifying maternal deaths to include:

- Deaths from a maternal cause (pregnancy related) AND
- Pregnancy Associated Death as indicated by the Pregnancy Checkbox alone

**PREGNANCY RELATED DEATH:** The cause of death is from a direct or indirect maternal causes.

**PREGNANCY ASSOCIATED DEATH:** Death to a woman **from any cause**, while she is pregnant or within 1 year of end of pregnancy, regardless of duration and site of pregnancy. Includes both pregnancy-related and incidental causes.

### PREGNANCY CHECKBOX INCLUDES

- Pregnant at time of death
- Not pregnant at time of death, but pregnant within the last 42 days
- Not pregnant at time of death, but pregnant 43 days to 1 year before death

### DETAILS

- The Iowa Annual Health Statistics Report has accounted for maternal deaths based on ICD-10 codes for years 2020 and prior when the death was a pregnancy related death based on this definition: Death to a woman which occurs during or within one year of the end of a pregnancy from any cause related to or aggravated by the pregnancy or its management, but not from accidental or incidental causes
- The change in the federal reporting to better identify maternal deaths using both cause of death and the pregnancy checkbox has increased the maternal death rate between years 2020 and 2021
- In addition, any death of a woman who was pregnant or pregnant within the past year, and the cause of death was COVID, would be considered a maternal death based on pregnancy status alone

## Additional Resources

There is a tool developed by the Iowa Department of Health and Human Services (HHS) called the *Iowa Public Health Tracking Portal*. The Iowa Public Health Tracking program was initiated from a grant awarded to the Division of Environmental Health, which resulted in the creation of the Environmental Public Health Tracking (EPHT) Program. The initiative is supported by the Centers for Disease Control and Prevention (CDC), and has been already carried out in 22 other states. More information can be found on the tracking portal, [tracking.idph.iowa.gov](https://tracking.idph.iowa.gov).

The *Iowa Health Fact Book* is a joint publication of HHS and the College of Public Health at the University of Iowa. Links to this document can be found online at [iowahealthfactbook.org](http://iowahealthfactbook.org).

The State Data Center of Iowa is your source for population, housing, business and government statistics about Iowa, including data from the U.S. Census Bureau, Iowa state agencies, and other state and federal sources. Iowa Department of Public Health, Bureau of Health Statistics, is an affiliate agency that can assist in providing local access to census data across Iowa. This can also be accessed through the HHS website or by going to [www.iowadatacenter.org](http://www.iowadatacenter.org).

## Technical Notes

**ANNULMENT:** A court decree voiding a marriage from the beginning. Annulments are included with divorces for rate calculation purposes and are available only by place of occurrence.

**CAUSE OF DEATH:** Deaths, by cause, are classified according to the International Classification of Diseases, Tenth Revision, adapted for use in the United States. It is the disease or injury that initiated the sequence of morbid events leading directly to death, or the circumstances of the accident or violence, which produced fatal injury. The responsibility for indicating the underlying cause of death is that of the certifying physician or medical examiner.

**CONGENITAL MALFORMATION:** Deformity existing before birth.

**DIVORCE:** A court decree dissolving a marital relationship. Divorces are included with annulments for rate calculation purposes and are available only by place of occurrence.

**FETAL DEATH:** A birth that fails to show any sign of life after delivery. Reportable fetal deaths in Iowa are those greater than 20 weeks gestation. The responsibility of determining if a birth meets this definition is that of the attending physician. Fetal death and stillbirth are synonymous terms.

**INFANT DEATH:** Death of a live-born infant under one year of age, and includes both neonatal and postneonatal deaths.

**LIVE BIRTH:** A birth that shows any sign of life after delivery. The World Health Organization considers a sign of life as being the breathing or showing of any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached. The responsibility of determining if a birth meets this definition is that of the attending physician. In this publication, the terms live birth and birth are used synonymously.

**LIVE BIRTH ORDER:** An expression of the numeric relationship of a child to others live-born to that mother.

**LOW BIRTH WEIGHT:** A weight at birth of less than 2,500 grams, or 5 pounds, 9 ounces.

**MARRIAGE:** The legal union of individuals. Marriages are available only by place of occurrence.

**MATERNAL DEATH:** A death due to complications of pregnancy, labor, delivery, or puerperium.

**NEONATAL DEATH:** Death of a live-born infant occurring within the first 27 days of life.

**OCCURRENCE DATA:** Data compiled by the geographical place the event occurred without regard to residence.

**PERINATAL DEATH:** Death of a fetus of greater than 20 weeks gestation or death of a live-born infant under 28 days of life.

**PRIMARY MARRIAGE:** Dissolution of a first marriage for both parties.

**POSTNEONATAL DEATH:** Death of a live-born infant after the first 27 days of life, but before one year of age.

**RESIDENT DATA:** Data compiled by the usual place of residence without regard to geographical place where the event occurred. For births, the mother's usual residence is used as the place of residence of the child.

### TIPS ON USING VITAL STATISTICS

This publication is a historical recording of the most requested statistics on vital events and is a source of information that can be used in further analysis. While many users of the vital statistics have a good working knowledge of this subject, others may not fully understand the data limitations. This section discusses items to help the reader use this document.

**QUALITY OF THE DATA:** Every precaution is taken to minimize the errors in the raw data during its preparation and receipt. The data are from certificates of vital events: births, deaths, marriages, divorces and annulments.

Each document is edited for consistency and completeness. Queries are initiated to complete or verify information on the certificate. The department is not able to change information on certificates without the certifier concurrence. Therefore, the quality of the data is often dependent on the decisions of the certifying agent.

**RESIDENCE OR OCCURRENCE:** All data contained in this publication are by residence except marriages and dissolutions, or as otherwise noted.

## Technical Notes (continued)

### RACE

**WHITE:** A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.

**BLACK OR AFRICAN AMERICAN (BLACK):** A person having origins in any of the Black racial groups of Africa.

**AMERICAN INDIAN OR ALASKAN NATIVE (AIAN):** A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment.

**ASIAN:** A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, India, China, the Philippine Islands, Japan, Korea, or Vietnam.

**NATIVE HAWAIIAN OR OTHER PACIFIC ISLANDER (NHOPPI):** A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.

**TWO OR MORE RACES (TOM RACES):** People may choose to provide two or more races either by checking two or more race response check boxes, by providing multiple responses, or by some combination of check boxes and other responses. The race response categories shown on the questionnaire are collapsed into the five minimum race groups identified by OMB, and the Census Bureau's "Some Other Race" category. For data product purposes, "Two or More Races" refers to combinations of two or more of the following race categories: White, Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian or Other Pacific Islander, or Some Other Race.

**OTHER RACE:** Includes persons stating themselves as other than any of the categories listed above.

**HISPANIC OR LATINO ETHNICITY:** A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.

**TOTALS, RATES, OR RATIOS:** Vital events can be reported as totals, rates or ratios. Totals will suffice as long as the user knows how many times a certain event occurred and no relationship comparison is to be made with other areas or different periods.

When different areas or periods are being studied, it may be best to use rates or ratios. Populations vary between areas over time in the same area. It may be that variations in occurrence result from changes in the population and do not indicate a new trend in the vital event.

Rates or ratios express the occurrence of vital events in relation to a set standard. For example, the crude birth rate is expressed per 1,000 total population; the age-specific birth rate is expressed per 1,000 females in the specific age category. The comparison removes differences between sizes of the age group being compared over time and allows for analysis of changes in vital event patterns.

**SMALL NUMBER LIMITATIONS:** There are two limitations involving small numbers. One involves a small number of occurrences for a particular vital event. The other involves rates or ratios calculated for a small population even though the number of occurrences of that event may not be considered small. Caution should be exercised concerning the use of such data. Statistical stability cannot be assured when small numbers are used in some formulas. Determination of what constitutes a small number must be made by that of the individual user. Numbers smaller than 16 and populations less than 100 are generally considered unstable for use in most statistical computations.

## Formulas

### NATALITY FORMULAS

$$\text{Birth Rate} = \frac{\# \text{ of Live Births}}{\text{Estimated Midyear Population}} \times 1,000$$

$$\text{Low Birth Weight Ratio} = \frac{\# \text{ of Live Births} < 2,500 \text{ grams}}{\# \text{ of Live Births}} \times 1,000$$

$$\text{Ratio of Births to Unmarried Women} = \frac{\# \text{ of Live Births to Unmarried Women}}{\# \text{ of Live Births}} \times 1,000$$

$$\text{Age-Specific Birth Rate} = \frac{\# \text{ of Live Births to Women in Specific Age Group}}{\text{Estimated Female Population in that Age Group}} \times 1,000$$

$$\text{General Fertility Rate} = \frac{\# \text{ of Live Births}}{\text{Estimated Female Population, Aged 15-44}} \times 1,000$$

### MARRIAGE FORMULA

$$\text{Marriage Rate} = \frac{\# \text{ of Marriages}}{\text{Estimated Midyear Population}} \times 1,000$$

### DIVORCE FORMULA

$$\text{Divorce Rate} = \frac{\# \text{ of Divorces and Annulments}}{\text{Estimated Midyear Population}} \times 1,000$$

## Formulas (continued)

### MORTALITY FORMULAS

$$\text{Death Rate} = \frac{\text{# of Deaths}}{\text{Estimated Midyear Population}} \times 1,000$$

$$\text{Age-Adjusted Death Rate*} = \left( \frac{\text{Decedents } < 1 \text{ Year of Age}}{\text{IA Midyear Pop. } < 1 \text{ Year of Age}} \times 2000 \text{ US Standard Million Population } < 1 \text{ Year of Age} + \right.$$

$$\left. \frac{\text{Decedents Aged 1-4}}{\text{IA Midyear Pop. Aged 1-4}} \times 2000 \text{ US Standard Million Population Aged 1-4} + \right.$$

$$\left. \frac{\text{Decedents Aged 5-14}}{\text{IA Midyear Pop. Aged 5-14}} \times 2000 \text{ US Standard Million Population Aged 5-14} + \right.$$

$$\left. \frac{\text{Decedents Aged 15-24}}{\text{IA Midyear Pop. Aged 15-24}} \times 2000 \text{ US Standard Million Population Aged 15-24} + \right.$$

$$\left. \frac{\text{Decedents Aged 25-34}}{\text{IA Midyear Pop. Aged 25-34}} \times 2000 \text{ US Standard Million Population Aged 25-34} + \right.$$

$$\left. \frac{\text{Decedents Aged 35-44}}{\text{IA Midyear Pop. Aged 35-44}} \times 2000 \text{ US Standard Million Population Aged 35-44} + \right.$$

$$\left. \frac{\text{Decedents Aged 45-54}}{\text{IA Midyear Pop. Aged 45-54}} \times 2000 \text{ US Standard Million Population Aged 45-54} + \right.$$

$$\left. \frac{\text{Decedents Aged 55-64}}{\text{IA Midyear Pop. Aged 55-64}} \times 2000 \text{ US Standard Million Population Aged 55-64} + \right.$$

$$\left. \frac{\text{Decedents Aged 65-74}}{\text{IA Midyear Pop. Aged 65-74+}} \times 2000 \text{ US Standard Million Population Aged 65-74} + \right.$$

$$\left. \frac{\text{Decedents Aged 75-84}}{\text{IA Midyear Pop. Aged 75-84}} \times 2000 \text{ US Standard Million Population Aged 75-84} + \right.$$

$$\left. \frac{\text{Decedents Aged } \geq 85}{\text{IA Midyear Pop. Aged } \geq 85} \times 2000 \text{ US Standard Million Population Aged } \geq 85 \right)$$

—————  
2000 Total US Standard Million Population × 1,000

\*Year 2000 Projected Standard Population may be used in the above formulas.

## Formulas (continued)

### MORTALITY FORMULAS

$$\text{Cause-Specific Death Rate} = \frac{\text{# of Deaths of Specific Cause}}{\text{Estimated Midyear Population}} \times 100,000$$

$$\text{Age-Specific Death Rate} = \frac{\text{# of Deaths of Specific Age Group}}{\text{Estimated Population in that Age Group}} \times 1,000$$

$$\text{Infant Death Rate} = \frac{\text{# of Deaths < 1 Year of Age}}{\text{# of Live Births}} \times 1,000$$

$$\text{Cause-Specific Infant Death Rate} = \frac{\text{# of Deaths < 1 Year for Specific Cause}}{\text{# of Live Births}} \times 1,000$$

$$\text{Neonatal Death Rate} = \frac{\text{# of Deaths < 28 Days of Age}}{\text{# of Live Births}} \times 1,000$$

$$\text{Postneonatal Death Rate} = \frac{\text{# of Deaths} \geq 28 \text{ Days of Age, but} < 1 \text{ Year of Age}}{\text{# of Live Births}} \times 1,000$$

$$\text{Perinatal Death Rate} = \frac{(\text{# of Fetal Deaths} \geq 20 \text{ Weeks of Gestation} + \text{Infant Deaths} < 28 \text{ Days of Age})}{\text{# of Live Births}} \times 1,000$$

(The definition of Perinatal Mortality varies from state to state. Caution should be exercised in comparing this rate between states.)

$$\text{Fetal Death Ratio} = \frac{\text{# of Fetal Deaths} \geq 20 \text{ Weeks of Gestation}}{(\text{# of Live Births} + \text{# of Fetal Deaths} \geq 20 \text{ Weeks of Gestation})} \times 1,000$$

$$\text{Maternal Mortality Rate} = \frac{\text{# of Deaths due to Pregnancy, childbirth and the Puerperium (ICD-10: O00 to O99)}}{\text{# of Live Births}} \times 100,000$$

### TERMINATION OF PREGNANCY FORMULAS

$$\text{Termination Rate} = \frac{\text{# of Terminations}}{\text{Female Population, Aged 15-44}} \times 1,000$$

$$\text{Termination Ratio} = \frac{\text{# of Terminations}}{\text{# of Live Births}} \times 1,000$$

$$\text{Pregnancy Rate} = \frac{\text{# of (Live Births + Fetal Deaths + Terminations)}}{\text{Female Population, Aged 15-44}} \times 1,000$$

## Iowa Summary Highlights

## Selected Records and Trivia Iowa 2021

### NATALITY

Oldest Father	69	Oldest Mother	51
Youngest Father	14	Youngest Mother	13
Highest Weight Reported in grams	6,333 (13 lb. 15 oz.)	Lowest Weight Reported in grams	93 (0 lb. 3 oz.)
Day Most Births Occurred On	July 7 (151 Births)	Month Most Births Occurred In	July (3,361 Births)
Days Fewest Births Occurred On	June 13 (43 Births)	Month Fewest Births Occurred In	February (2,740 Births)
Highest Birth Order	15 (14 live-born siblings)		

### MOST POPULAR NAMES FOR BABIES

THE + AND - NUMBERS ARE CHANGES IN THE NAME'S POPULARITY RANK FROM THE PREVIOUS YEAR

#### Boys

Names	#	Names	#
Oliver	204 ±0	Jack	113 -4
Liam	171 ±0	William	112 -7
Henry	167 +1	Benjamin	105 +4
Noah	139 +2	Maverick	100 -5
Asher	136 +11	Lucas	99 +14
Theodore	130 -3	James	97 -2
Hudson	124 +7	Lincoln	93 -7
Owen	121 -1	Grayson	92 +5
Elijah	117 +3	Jackson	92 -5
Brooks	116 +9	Wyatt	91 -9

#### Girls

Names	#	Names	#
Charlotte	173 +1	Eleanor	95 -1
Olivia	156 -1	Hazel	94 -3
Amelia	136 +2	Avery	88 +4
Ava	127 +2	Paisley	78 +28
Emma	121 -1	Scarlett	78 +12
Sophia	113 +2	Mia	77 -5
Nora	112 +5	Grace	73 +6
Evelyn	109 -5	Aurora	72 +3
Harper	99 -2	Ellie	72 +9
Willow	98 +9	Isla	72 +9

### MORTALITY

Oldest Male	104	Oldest Female	112
Day Most Deaths Occurred On	November 22 (135 Deaths each)	Month Most Deaths Occurred In	December (3,552 Deaths)
Day Fewest Deaths Occurred On	August 29 (59 Deaths)	Month Fewest Deaths Occurred In	June (2,429 Deaths)

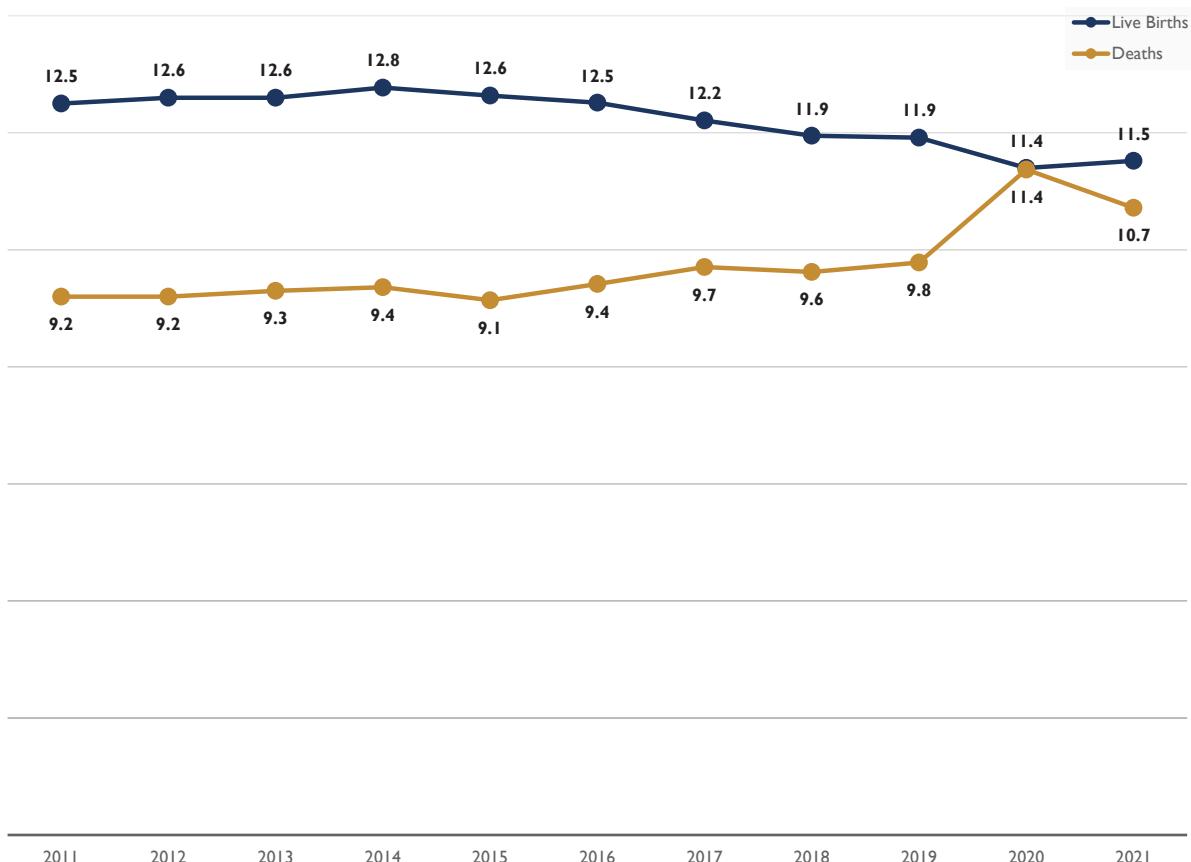

### MARRIAGE

Oldest Male	94	Oldest Female	92
Youngest Male	17	Youngest Female	16
Day Most Marriages Occurred On	September 18 (494 Marriages)	Month Most Marriages Occurred In	October (2,511 Marriages)
Day Fewest Marriages Occurred On	Jan. 18 & April 19 (2 Marriages Each)	Month Fewest Marriages Occurred In	February (555 Marriages)

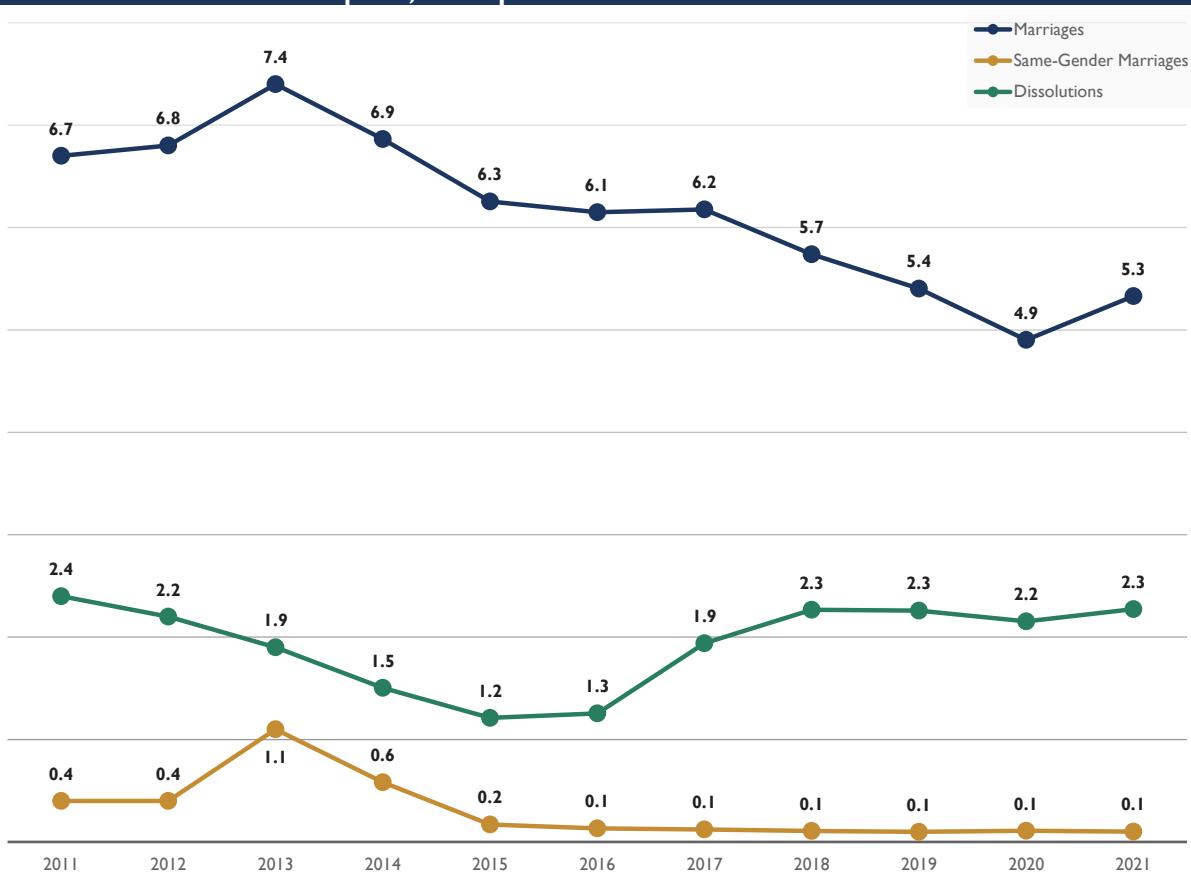

### DISSOLUTIONS

Oldest Male Divorcee	94	Oldest Female Divorcee	89
Youngest Male Divorcee	18	Youngest Female Divorcee	18
Marriage of Longest Duration Ending in Divorce	71 Years	Marriage of Shortest Duration Ending in Divorce	12 Days

## **Explanation of Vital Events**

Statistics are based on resident data, except for marriages and dissolutions, which are recorded in the county where the events occurred.

Rates for live births, deaths, marriages and dissolutions are calculated per 1,000 estimated population; selected causes of death rates are per 100,000 population.

Rates of out-of-wedlock live births, mothers under age 20, low birth weight, live births, congenital malformations, fetal deaths, neonatal deaths, perinatal deaths and infant deaths are per 1,000 live births. Maternal deaths are per 100,000 live births.
